

THINK Cloud for Government 2014: 25 March

***Cloud computing is revolutionising the way the government engages the procurement and delivery of IT.***

Cloud computing is revolutionising the way the government engages the procurement and delivery of IT. For decades, public sector IT has been dominated by multi-year, multi-million pound/dollar/euro contracts. All this changes with the cloud. THINK Cloud for Government 2014 is the must attend event for anyone seeking to engage with the latest knowledge and developments surrounding this game-changing area. Mastek will be on Stand 31 at the event on Tuesday 25th March at the Business Design Centre in London.

Visit our sponsorship page for more information about our presence and what we can offer at THINK Cloud for Government 2014.
