

Home Office IPT Portfolio Wins Best Agile Project at European Testing Awards

My heartiest congratulations to our teams working on the Home Office Immigration Platforms Technology (IPT) Portfolio for winning the prestigious 'Best Agile Project Award 2016' at the European Testing Awards! This is a fantastic feat of achievement, representing a significant effort over the last couple of years on the Programme and proves the worth in winning this award.

The Home Office continues to be one of our key government engagements in the UK — going from strength to strength in delivering digital transformation to the UK Visa's and Immigration sector. The success is underpinned by our joint cultural ethos of working in collaboration and transparency with the department. This nomination was submitted jointly with our client Home Office IPT.
