

## Mastek Wins European Software Testing Awards

We are delighted to announce that **Mastek along with Specsavers**, our customer has won the coveted [European Software Testing Awards](#) in the **Best Test Automation Project - Functional** category.

The award acknowledges the best use of automation in a functional software testing project, use of a matured suite of testing scripts and evidence of commitment to industry best practices and standards amongst several other criteria - all of which, Mastek and Specsavers collaborating closely as a team have achieved. Congratulations! To the Mastek and Specsavers team working on the project, whose untiring efforts have helped win this prestigious award.

Not to be forgotten are the achievements of the SLC (Student Loans Company) team who were a finalist in the Best Agile Project category at this industry award. Well done!

This year has been exceptionally rewarding on industry award accolades and shortlists for Mastek with the two **DevOps Industry Awards** (Best Overall DevOps Project and DevOps Manager of the Year) won by IndigoBlue recently and this European Software Testing Award win. We have also had an incredible shortlisting in four categories at the **UK IT Industry Awards**.

All these achievements are steadily serving to transform the Mastek brand into an industry-leading, award-winning provider of enterprise software solutions.
