

Home Office Immigration Technologies Wins Best Use of Cloud Services Award at the UK IT Industry Awards

Reading, U.K. – November 17, 2017 – We are pleased to announce that this November, the Home Office Immigration Technology Programme won the prestigious ‘Best Use of Cloud Services’ award at the UK IT Awards 2017. This is a project that Mastek has been involved in delivering since its inception in 2013.

Mastek joined the IPT leadership team and UK’s leading technology companies and professionals at London’s Battersea Park for the UK IT Industry Awards 2017. The award focuses on project teams that achieve exceptional results through outstanding project implementation.

In conjunction with other suppliers, Mastek helped the Home Office IPT to successfully migrate critical applications to the AWS infrastructure. With the approach taken by Mastek to migrate the critical applications, IPT achieved the migration with minimal downtime and no loss of service. This was a successful and clean migration of critical applications that were live for close to two years.

About Mastek

Mastek is a digital transformation specialist that engineers excellence for customers in the UK, US and India. We enable large scale business change programmes through our service offerings, which include agile consulting, digital commerce, BI and analytics, application development, support and testing. Whether it's creating new applications, modernising existing ones or recovering failing projects, we help enterprises to navigate the digital landscape and stay competitive.
