

# Mastek and InsFocus Partner to Deliver Business Analytics Solutions

06 Nov, 2014

Mastek, the global enterprise application expert and InsFocus Systems Ltd., a global, business intelligence (BI) specialist for the insurance sector, today announced a strategic partnership to offer UK general insurers an end-to-end suite of data warehousing and business analytics solutions.

6 November 2014 –Mastek, the global enterprise application expert and InsFocus Systems Ltd., a global, business intelligence (BI) specialist for the insurance sector, today announced a strategic partnership to offer UK general insurers an end-to-end suite of data warehousing and business analytics solutions.

Built and delivered by insurance domain experts with several years of implementation best practices, the InsFocus BI solution meets the specific requirements of insurance companies and includes a variety of pre-built, out-of-the-box, insurance-specific dashboards, analyses, functions and reports. It enables business executives and management across all insurance domains including underwriting, claims, reinsurance and marketing to stay ahead of the competition by taking advantage of the ready-to-use, built-in, domain-specific insurance models.

Mastek and InsFocus jointly showcased the InsFocus BI solution at the Analytics for Insurance Europe 2014, industry event held in London recently, which drew a lot of interest from general insurers.

According to Vidyesh Khanolkar, Head of Insurance and Financial Services at Mastek UK, “I believe that together, Mastek and InsFocus offer insurers the benefits of complementary services through which they can achieve quick RoI. He asserted, “Mastek has successfully implemented projects for 100+ insurers globally. Additionally, we have proven experience in BI and have successfully implemented mega projects involving petabytes of data and delivering them on time and within budgets.”

Says Uri Taiber, CEO at InsFocus, “InsFocus BI enables insurers to improve underwriting results and control risks. The system can be applied to all general insurance lines and includes over 40 calculation templates, more than 300 measurements and key performance indicators (KPIs), and 170 reports.” Its user-friendly interface uses familiar insurance terminology, enabling business users to generate reports and analyses with great flexibility whilst easily consolidating, searching and visualising business data for profitability and growth.

## **About Mastek**

A global, enterprise-level technology solutions provider, Mastek combines the strengths of a world class product company with a specialist services organisation.
