Gain test efficiency improvements with Mastek's QCheck framework

The QCheck test maturity assessment framework helps businesses evaluate and correct test process gaps, and benefit from approx. 40% cost-savings.

READING, U.K. – Dec 10, 2018: Mastek, a leading enterprise digital transformation specialist is helping organisations overcome delays in testing. Through its test maturity assessment service, Mastek provides businesses transparent, unbiased testing gap analysis and consultancy to identify and eliminate the gaps in testing processes.

When organisations fail to implement best practice processes, software testing typically incurs more effort than anticipated, delaying the launch of software and leading to cost overruns. Mastek's QCheck test maturity assessment framework provides a structured approach for strengthening software test processes. It identifies the strengths, weaknesses and maturity of an existing test process - generating a clearly guided path to improvement and increasing the value of testing to each firm. As a result, businesses benefit from a 30-40% cost savings with right-first-time delivery, 20% release-on-release savings and reduce defect leakage to less than three percent.

The QCheck assessment is delivered by expert test process consultants. By matching the assessment to an organisation's business goals, QCheck delivers the levers and roadmap for continuous improvement and provides the basis for cumulative, long-term benefits.

Says Gordon Cullum, Chief Technology Officer at Mastek, "Businesses face challenges from competitive pressures and user demands to deliver new applications and functionality in the shortest possible timescale. An effective test maturity assessment can enable firms to fully benefit. Our proven solution, QCheck can improve testing efficiency; thereby reduce the costs of defect detection and correction, whilst increasing the overall efficiency of business operations."

The assessment analyses different delivery methodologies and considers each phase of the testing process, starting with inception right through to implementation and closure.

About Mastek

Mastek is an enterprise digital transformation specialist that engineers excellence for customers in the UK, US and India. We enable large-scale business change programmes through our service offerings, which include application development, support and testing, BI and analytics, agile consulting and digital commerce. Whether it is creating new applications, modernising existing ones or recovering failing projects, we help enterprises to navigate the digital landscape and stay competitive.
