

Ministry of Defence Awards Army Data Warehouse Enhancement and Applications Support Services to Mastek

Reading, U.K. – March 05, 2018 – Mastek has won two projects with the British Army Information Application Services (IAS). These include a project to support and enhance the Army Data Warehouse (ADW), and the delivery of secure, Application Support Services.

The ADW is the sole repository for consolidating Army and Defence data, providing reporting on Army activities. Mastek will support, manage and provide business intelligence solutions that will enable the Army to make data driven decisions. The ADW enhancement and support will be delivered using agile Kanban software development processes.

The Application Support Services comprise 2nd and 3rd line support, systems engineering and database administration wherein Mastek will provide the delivery, support and ongoing maintenance of the Army's Public and Private cloud infrastructure including DevOps and Infrastructure management solutions. These systems form part of the Army Information Application Services (IAS) and digital ICT cloud environments including IaaS, PaaS and SaaS based services.

According to Lt. Col. Dorian Seabrook – Army IAS, “The service that we have received from Mastek on a previous project, their credentials and core BIDW capabilities offers us the confidence in their capabilities, which will assist the Army in maturing the ADW to make accurate data driven decisions based on the enhanced reporting the capability provides.”

“Mastek is a key technology supplier in the public sector space. This opportunity to partner with the British Army Information Application Services division as their Data Warehousing and Application Support Services partner is an affirmation of our experience and expertise on central government department projects,” says Ritujit Sikand, Account Director – Mastek.

About Mastek

Mastek is a digital transformation specialist that engineers' excellence for customers in the UK, US and India. We enable large scale business change programmes through our service offerings, which include agile consulting, digital commerce, BI and analytics, application development, support and testing.
