

## Mastek Collaborates With Microsoft To Organize A Hackathon For Strengthening Their Low Code Practice

**Mumbai, India – February 15<sup>th</sup>, 2022:** With a focus to enable Business Agility for its customers as well as accelerate internal transformation programs, the Mastek ‘Innovation team’ collaborated with Microsoft to drive Hackathon across geographies.

The program enabled 500+ Masteekers to work on innovative ideas that have the potential to drive Business Value by leveraging Microsoft’s low-code platform – Power Apps in the areas such as Employee Sentiment & Productivity, Mixed reality, Patient care, Financial Planning, etc.

The winning team put together a solution with Microsoft power apps which not only automated the cumbersome expense system but also provided an efficient track and trace functionality.

Mastek has been working with Microsoft & its technologies for more than 2 decades now and has a plan to continue investing in building solid offerings for their global customers as well as driving internal Transformation Programs using Microsoft technologies. Hackathon was a demonstration of the commitment to enable Masteekers in developing niche skills aligning with their customers’ priorities.

*“In continuation with Mastek’s strategic focus and priority in establishing a Microsoft Business and Practice Unit, it gives me immense pleasure to have our Tech Research and Innovation team partner with Microsoft to run Microsoft Power Apps hackathon across the globe. The objective of this hackathon was to enable Business Agility for our Customers as well as accelerate Internal Transformation Programs.”*–

**Narasimha Murthy, Group Chief Delivery & Capabilities Officer, Mastek**

*“Power Apps is driving a cultural change in the way businesses approach app development. It’s amazing to see a new category of innovative service offerings that can help not just Mastek but also our customers, driven by citizen developers at scale. I am truly inspired by the efforts of all the participants in the Hackathon,”* said **Irina Ghose, Executive Director, Cloud Solutions, Microsoft India.**
